Summary

Final-year Information Science Engineering student specializing in Cybersecurity Engineering, focused on cloud security. Hands-on experience auditing AWS IAM configurations against least-privilege and CIS Benchmark standards, and mapping compliance gaps to NIST CSF controls. Working knowledge of Microsoft Entra ID / Azure AD, IAM/RBAC design, MFA/SSO, container security scanning, and SIEM-based threat monitoring. Seeking an entry-level Cloud Security Engineer role to help secure cloud infrastructure and identity environments.

Education

Nitte Meenakshi Institute of Technology Bengaluru
B.E. in Information Science and Engineering | CGPA: 7.25/10 *2024 – 2027*

NMIT Polytechnic Bengaluru
Diploma in Electronics and Communication Engineering | 82.15% *2021 – 2024*

Technical Skills

Cloud Platforms & Security: AWS (IAM, S3, EC2 fundamentals), Microsoft Entra ID / Azure AD, Cloud Security Posture Fundamentals, Least-Privilege Access

Identity & Access Management: IAM, RBAC, MFA/SSO, SAML, OAuth 2.0, OpenID Connect

GRC & Compliance: NIST CSF, ISO 27001, CIS Benchmarks, Risk & Compliance Reporting

Security Assessment: Vulnerability Assessment, Penetration Testing, OWASP Top 10, Kali Linux

Container & DevSecOps: Docker, Trivy, CI/CD (GitHub Actions, Jenkins), Python Automation

SIEM & Monitoring: Wazuh, ELK Stack (Elasticsearch, Logstash, Kibana), Log Analysis, Threat Detection, Incident Response Fundamentals

Programming & Networking: Python, Bash, PowerShell, SQL, TCP/IP, DNS, HTTP/HTTPS

Featured Project

Cloud IAM Compliance Automation *AWS IAM · Python · CIS Benchmarks · NIST CSF*

- Built a Python-based auditing tool to evaluate AWS IAM policies, roles, and users against least-privilege principles and CIS Benchmark controls.
- Key finding: flagged over-permissioned IAM roles, unused access keys, and misconfigured trust policies across sample AWS accounts, surfacing gaps invisible to manual review.
- Delivered structured compliance reports mapping each finding to a NIST CSF control category, giving remediation teams a clear, prioritized action list.
- Designed the tool to be extensible for scheduled/CI-driven IAM audits, enabling continuous rather than point-in-time compliance checks.

Additional Projects

DevSecOps-Based AI Malware Detection for Container Images *Python · Docker · Trivy · GitHub Actions*

- Integrated Trivy vulnerability scanning into a CI/CD pipeline and built an ML-based detection module to flag anomalous container image patterns before deployment, reducing manual review effort in the pipeline.

SIEM & Security Monitoring Lab *Wazuh · ELK Stack · Linux*

- Deployed a Wazuh/ELK-based SIEM lab with detection rules and dashboards that successfully flagged simulated brute-force attempts, privilege escalation, and anomalous logins during testing.

Certifications

Google Cybersecurity Professional Certificate (2026) • Google Cloud Computing Training (2024) • CompTIA Security+ (In Progress, Expected 2027)

Cisco Networking Academy – Ethical Hacker (2025) • Cisco Networking Academy – CCNA / Networking Coursework (2025)

Achievements & Involvement

- Active participant in Capture The Flag (CTF) challenges on platforms such as TryHackMe and Hack The Box, covering web exploitation and Linux privilege escalation.
